

ÍNDICE DE VINYAR TENGWAR

Versión 1.02 – Febrero de 2006

Este índice enumera, en orden alfabético, las palabras, raíces, afijos, etc. pertenecientes a los idiomas inventados por J.R.R. Tolkien y que aparecen documentados, discutidos o mencionados en la publicación *Vinyar Tengwar* (VT). Pretende servir como guía al investigador que necesita hallar fácilmente una referencia, o profundizar en el estudio de las formas mediante un acceso rápido a los sitios en que puede hallar datos pertinentes.

La información aquí compilada se reduce a la ubicación bibliográfica de las formas: de cada una sólo se menciona el volumen y página en que aparece, sin el menor análisis. No se indica ni el significado ni la morfología. No se unifican declinaciones y conjugaciones: cada una de las formas de **entu**, **ensi**, **enta** en VT36:8, por ejemplo, recibe una entrada separada. Ni siquiera se distinguen los homófonos, sino que, digamos, las apariciones de **esse** (pronombre en VT36:8 y sustantivo en VT45:12) caen aquí bajo la misma entrada.

El criterio de inclusión de cada referencia es generoso. No se lista solamente la atestación simple, que sería la transcripción directa del texto de Tolkien en que se da cada forma, sino todas las ocasiones en que de uno u otro modo se hace referencia a una forma por su interés lingüístico, sea por atestación directa, sea porque se discute la forma en cuestión, sea porque se la toma como referencia para explicar otra. Con ello el volumen de este índice se ha multiplicado varias veces, pero en nuestra opinión no en vano.

También se han incluido las formas hipotéticas, no documentadas en el *corpus* tolkieniano, que se postulan para explicar formas documentadas, para establecer analogías, indicar formas erróneas, etc. (p.ej., ***assa-t-3ō** en VT36:25, ****airelya** en VT43:9, etc.)¹.

Las formas se dan aquí con la grafía exacta con que figuran en VT. No se han regularizado a una forma estándar algunos casos comunes como la equivalencia de **c** y **k** en Q(u)enya, el uso de diéresis, etc. etc. La razón es sencilla, y está emparentada con la que nos llevó a no profundizar en el análisis: mientras las formas, tal como aparecen impresas, obligan a una metodología limitada pero coherente, cualquier tipo de análisis y de estandarización exige decisiones de diversa índole, que sólo pueden ser idiosincráticas y que llevan a prólogos más extensos aun que éste. Por otra parte, el criterio editorial de VT parece ser la referencia exacta a la forma impresa en textos previos (p.ej., en la HTM), de modo que se juzgó más adecuado seguir la misma práctica. En última instancia, la más leve familiaridad con el estudio de las lenguas tolkienianas basta para salvar estas dificultades: por ejemplo, no se ha considerado necesario hacer una referencia cruzada a **alkar** en la entrada para **alcar**.

Pese a todo, se detallan a continuación algunos criterios imprescindibles para dar unidad metodológica al trabajo:

- La diferencia entre mayúsculas y minúsculas es significativa en muchos casos. Tolkien las usa, obviamente, para los nombres propios, pero también para indicar las raíces, y a veces con objetivos más específicos (como marcar una consonante reforzada en **laS-ē**, VT39:9). Se han distinguido estos casos, pero no el uso fortuito de mayúsculas al principio de oración (aunque en estos últimos casos se deja constancia en la entrada, indicando grafías alternativas como **aire / Aire**).
- Se han conservado los signos como * (asterisco para forma no documentada), - (guión para formas sin desinencias o radicales, afijos, raíces extendidas, análisis de morfemas etc.), ·

¹ Lamentablemente, el editor y los contribuyentes de VT usan normalmente un asterisco (*) para indicar formas no documentadas. Esto en sí no esobjetable, pero coincide con el uso que Tolkien mismo hace de este signo para señalar formas históricas deducidas, de modo que sólo es posible distinguir entre unas y otras mediante el contexto. En este índice no se ha hecho ningún esfuerzo por separarlas.

(punto alto con que Tolkien suele separar artículos y morfemas; no se lo considera separador de palabras), () (paréntesis para sonidos opcionales), √ (raíz), etc. Se han desecharo signos como ? (forma dudosa) o † (forma poética o arcaica).

- También se han unificado las formas inequívocamente señaladas como raíces y bases, sin establecer mayor diferencia entre un concepto y otro, identificadas por medio de mayúsculas, con guión final o sin él, o mediante el símbolo √ (p.ej., √kam / *KAM / KAM / √KAM).
- Las formas inconclusas o evidentemente erróneas de los textos de Tolkien se han incorporado sin mayor comentario (p.ej., ke en VT42:32 no es más que alguna forma incompleta de kemen).
- También se han agregado algunas formas muy comunes en que se usan desinencias inglesas, como Feanorian. No creemos que puedan hacer demasiado daño ya.
- Las entradas se presentan en orden estrictamente alfabético. Los signos fonéticos especiales obligan a alguna inconsistencia: ȝ figura inmediatamente después de h; ð y þ equivalen a dh y th respectivamente; æ y œ se ubican como ae y oe respectivamente; ȝ y ñ, considerados como equivalentes, después de n; ə se ubica en última posición; x equivale a ch; variantes como ð, ȝ, ȝ, etc. en los lugares de las letras a que corresponden. Los símbolos mencionados en el segundo punto se consideran inexistentes para el ordenamiento.
- Cuando en un sitio se incluye información sobre una forma pero no se la menciona tal como aparece en la entrada, la página correspondiente se da entre paréntesis (el caso típico son las menciones analíticas como assi-nta-s en VT36:25, contra el documentado assintas). También se usa el sistema para formas como milye, que sólo está implicada en (a)milye (VT47:26-7, etc.).
- Las erratas editoriales están incorporadas, pero se menciona entre paréntesis la forma correcta (que recibe además una entrada separada) según la lista compilada por Per Lindberg en <http://www.elvish.org/errata/> (sección *Vinyar Tengwar* – en muchos casos será necesario leer esa lista para comprender las referencias sintéticas de este índice). Además, se usó el mensaje de S. Berto (<http://groups.yahoo.com/group/lambengolmor/message/753>) para decidir sobre algunas formas divididas por guiones en VT45 y VT46.

Actualmente se encuentran cubiertas las siguientes secciones:

- VT36 pp. 5-6, 34 ‘Letters to VT’; pp. 7-29 ‘The Entu, Ensi, Enta Declension’.
- VT39: pp. 4-20 ‘From Quendi and Eldar, Appendix D’; pp. 21-34 ‘Ósanwe-kenta’.
- VT40: pp. 6-32 ‘Narqelion and the Early Lexicons’.
- VT41 pp. 3-4 ‘Letters to VT’; pp. 5-6 ‘Etymological Notes on the Ósanwe-kenta’; pp. 7-10 ‘From The Shibboleth of Fëanor’.
- VT42 pp. 3-4 ‘Letters to VT’; pp. 5-31 ‘The Rivers and Beacon-hills of Gondor’; pp. 32-4 ‘Negation in Quenya’.
- VT43: pp. 5-38 ‘Words of Joy’ (Part One).
- VT44 p. 4 ‘Letters to VT’; pp. 5-20 ‘Words of Joy’ (Part Two); pp. 21-30 ‘Ae Adar Nín’; pp. 31-38 ‘Alcar mi Tarmenel na Erun’.
- VT45: pp. 3-38 ‘Addenda and Corrigenda’ (Part One).
- VT46: pp. 3-23 ‘Addenda and Corrigenda’ (Part Two); pp. 28-9 ‘Appendix II: Inserted slips’.
- VT47: pp. 3-42 ‘Eldarin Hands, Fingers & Numerals – Part I’.
- VT48: pp. 4-34 ‘Eldarin Hands, Fingers & Numerals – Part II’.

entre las que, a grandes rasgos, están las que contienen mayor cantidad de información lingüística publicada por primera vez. Sin embargo, planeamos incorporar el resto de la publicación en breve (?). El índice, además, se irá actualizando con la aparición de nuevos ejemplares de VT.

NOTA PERSONAL: Comencé este trabajo como una mera serie de notas de uso privado para sistematizar la información, como un accesorio a otros trabajos de investigación lingüística; con el tiempo creció y exigió una dedicación cada vez mayor, hasta que se me hizo notar que bien podría constituir una herramienta de utilidad pública. Por ello lo sometí a una revisión general y me impuse una sistematización, que ofrezco en la introducción.

Si una vez terminado ayuda de alguna manera a algún investigador de la lingüística tolkieniana, daré el esfuerzo por productivo. Por mi parte, lo he encontrado muy útil, primero durante el proceso de su elaboración y luego como herramienta.

Por último, pero no menos importante, agradezco a Helios de Rosario Martínez, *Imrahil*, por sus valiosos consejos sobre cuestiones técnicas de la presentación; y especialmente a Enrique Esteban Mombello, quien con tanta generosidad como valor emprendió la ciclópea tarea de diseñar la fuente Argentia Roman para que hasta la menor marca diacrítica quedara en su lugar, como Eru manda.

ERRORES: es imposible que este índice no contenga errores, sean formas mal transcriptas, faltantes o sobrantes; sean inconsistencias con respecto al criterio autoimpuesto; sean defectos de ese mismo criterios. Lo he sometido a una serie de revisiones, y de todas ellas ha salido modificado. Cuando el lector detecte este tipo de problemas, le agradeceré que en vez de tirar el índice a la basura me haga llegar sus comentarios, a fin de que algún día este índice se transforme en una herramienta adecuada. Son particularmente interesantes los comentarios sobre el mejor modo de enfocar un trabajo de este tipo.

Hláford Diego A. Seguí
